**Question 35:** The popular form of America's agricultural organization is \_\_\_\_\_.

- A. farm                      B. enterprise                      C. cooperative                      D. household

## **PART II. SHORT ANSWER QUESTIONS (3 points)**

### **A. Read the passage below and answer the questions (1.0 point)**

It is 2050. Beyond the emissions reductions registered in 2015, no further efforts were made to control emissions. We are heading for a world that will be more than 3<sup>0</sup>C warmer by 2100 [...] Melting permafrost is also releasing ancient microbes that today's humans have never been exposed to and, as a result, have no resistance to. Diseases spread by mosquitoes and ticks are rampant as these species flourish in the changed climate, spreading to previously safe parts of the planet, increasingly overwhelming us. Worse still, the public health crisis of antibiotic resistance has only intensified as the population has grown denser in inhabitable areas and temperatures continue to rise.
